SFS MISSION AND MODEL

SFS creates transformative study abroad experiences through field-based learning and research. Our educational programs explore the social and ecological dimensions of the complex environmental problems faced by our local partners, contributing to sustainable solutions in the places where we live and work. The SFS community is part of a growing network of individuals and institutions committed to environmental stewardship.

The School for Field Studies offers semester and summer programs at field stations around the world. The academically rigorous and interdisciplinary curriculum of each program is designed to allow students to actively discover and understand the complexities of local environmental, social, and economic issues. Through teaching and research, center faculty and staff introduce students to field research methods, data collection, and analysis, and they promote student interactions and reciprocity with local communities. The curriculum and research projects are driven by local needs and interests. SFS programs integrate academic, research, social, and community activities in a holistic education model.
THE SFS CENTER FOR RAINFOREST STUDIES
ABOUT SFS AUSTRALIA

SFS-CRS is located on a 153-acre former grazing farm adjacent to a World Heritage site, near the town of Yungaburra on the Atherton Tablelands. The Center property supports stands of primary and secondary rainforest, including an endangered rainforest type, offering students a field laboratory and experimental site as part of their academic program. The primary focus of the Center’s program is on tropical rainforest management and restoration and its effects on the landscape and community.

ENVIRONMENTAL ISSUES OF THE REGION AND CRS RESEARCH PLAN

Lands on the Atherton Tablelands are rich in resources—fertile soil, moderate rainfall, high biodiversity; and are relatively flat. These characteristics make them suitable for agricultural development and settlement, which has resulted in land clearing and rainforest fragmentation over the past two centuries. Preliminary data and evidence also suggest that global climate change may be impacting flora and fauna in the Wet Tropics region. The Wet Tropics region has the highest number of regional endemic vertebrates in Australia, and the Atherton Tablelands are the only fragments of the critically endangered Mabi 5b tropical rainforest, making the forests important areas to protect and restore. Recognition of the value of the Wet Tropics forests has led to the protection of substantial areas of rainforest as World Heritage areas; including lands immediately adjacent to the SFS-CRS property.

The research goals of SFS-CRS are to understand the dynamics of rainforest ecosystems, including the potential impacts of global climate change, and develop rainforest restoration strategies that benefit the local ecosystems and communities. Restoration benefits may include, for example, soil stabilization to minimize runoff within a catchment, including reef components, and improving ecosystem resilience. Restoration may also influence the distribution and abundance of endemic wildlife, such as the Lumholtz’s tree kangaroo, which are important for both ecological and economic (i.e., tourism) reasons. The primary economic drivers on the Tablelands are nature-based tourism, and farming. How ecological restoration might help bolster the tourism industry is one of our major questions; however, more information is required to determine what kinds of ecological and economic benefits might be gained from increasing rainforest cover. It is also important to determine the most successful and cost-effective techniques to enable successful regeneration and restoration.

The Strategic Research Plan (SRP) at each SFS field station is the overarching research directive that addresses these critical local environmental challenges and explores local solutions working within the community. The SRP is generated by our faculty and is influenced by local stakeholders and actors, and external researchers. The SRP also provides the community and students with a framework for the program curriculum and influences how SFS courses, research, and outreach activities fit into the bigger picture of environmental conservation and sustainable development.

Research Focus
Currently the curriculum and research at SFS-CRS focuses on answering the question:

**How can the future of the Wet Tropics in a changing world be ensured?**

The rationale for this focus is that global climate change and fragmentation are resulting in degraded tropical rainforest ecosystems. SFS-CRS research and community projects help to identify, mitigate, and manage threats affecting rainforest survival and sustainability. This information can then be used to successfully develop forest regeneration and restoration projects. Within the main research plan focus, we address multiple issues, grouped in the following thematic areas: i) understanding social and ecological systems; ii) conflict, vulnerability, and change; and iii) effective response to change.

A key component of retaining and restoring tropical rainforest is understanding the threats affecting its survival. Therefore, we are gathering data on the attributes and structure of Type 1b (Hypsi), Type 5b (Mabi) and Type rainforest, and determining the factors affecting successful succession as these types of forest mature.

In addition to identifying the threats to Queensland rainforest, we also aim to develop effective natural regeneration and restoration methods and techniques. More information is needed to develop ecologically and economically sound restoration practices. This information will benefit tree planting organizations significantly. It can help them determine how site
maintenance influences plant growth and survival, site conditions that facilitate seedling recruitment, and the use of the site by fauna, particularly birds.

Long term sustainability of tropical rainforest requires justification of its management and restoration—in other words, attributing ecological and socioeconomic value to it. This research plan therefore looks at why we need to restore and retain tropical rainforest. It also identifies appropriate policy and institutional mechanisms for long term conservation planning. This information will help us to recommend regeneration and restoration methods and generate institutional support for promoting and funding rainforest conservation initiatives. Information can also be used to develop local and regional plans to sustain tropical rainforest.
PREPARING FOR DEPARTURE
PREPARING FOR DEPARTURE

REQUESTING LEARNING ACCOMMODATIONS

Students requesting learning accommodations should contact the SFS Office of Academic Affairs prior to the start of the program. SFS will work with students, home institutions, physicians, and counselors to determine the required level of accommodation and whether it can be safely and reasonably maintained on program.

Please be aware that due to the structure and schedule of our programs and the routine travel off campus, SFS may not be able to provide the same accommodations students receive at their home school. Additionally, the level of academic support services to which students may have access at their home campus may not be available with SFS. If students have used general academic services on campus, such as a writing center, math/technology center, or tutoring center and anticipate continued access while on an SFS program, please inform SFS as indicated below. The Office of Academic Affairs can advise students regarding the level of academic support at SFS centers and on managing the rigors of an SFS experience.

Learning accommodation requests should be sent:

By email: academics@fieldstudies.org

By mail:
SFS Dean of the School
The School for Field Studies
100 Cummings Center, Suite 534-G
Beverly, MA 01915

E-LIBRARY

Students should plan to rely on the databases and online library from their home institution during an SFS program. SFS does not provide additional access to any e-library resources. Before arriving in-country for an SFS program, students should make sure they know their remote library log-in and password, understand their home school’s policy on accessing library materials remotely, and configure their laptop to access their school’s online libraries and e-journals before they arrive in the field.

Students unable to access their institution’s e-library while abroad or are unaffiliated with an institution during their time abroad should discuss this with their SFS Admissions Counselor or inquire with academics@fieldstudies.org.

ACADEMIC CREDIT FROM SFS

SFS courses are accredited through the University of Minnesota: Twin Cities (UMN). Students in SFS programs are automatically registered at UMN, unless they come from SFS affiliated universities that grant direct credit (see below). Students registered through UMN receive their grades, credit, and transcripts from UMN.

UMN operates on a semester calendar, and all SFS courses are accredited accordingly. At the conclusion of the program, one official transcript will be sent to the home school of each student. Transcripts are not available until four to six weeks after the close of the SFS program.

CREDIT TRANSFER

The amount and type (major, minor, elective) of credit students receive for coursework done on an SFS program is determined by their home institution.

SFS cannot guarantee that students will receive credit for their SFS participation from their home institution. Students should not assume that a prior student’s success with credit transfer is a guarantee that their credits will transfer as well. It is the responsibility of the student to arrange credit transfer with their home school prior to participating in an SFS program. Students intending to receive academic credit at their home institution should speak with their academic advisor and/or study...
abroad office about how to best proceed. Students should allow time to have their SFS program and individual courses approved by their advisor and other appropriate personnel before the start of the program.
ACADEMICS WHILE ABROAD
ACADEMICS WHILE ABROAD

FIELD EXPERIENCE
An important component of the SFS learning model is hands-on field experience. Field lectures, exercises, and research help students to connect the conceptual material presented in the course to local realities, learn field research techniques, collect and analyze field data, and develop holistic and critical thinking skills. Many field-based academic activities on an SFS program take place outside; however, the actual amount of time spent outside will vary depending on the weather and other factors.

EXPECTATIONS
At SFS, we aim to create an academic atmosphere that encourages learning and involvement both inside and outside of the classroom. All students are expected to actively participate in all elements of an SFS program, including all SFS courses, field research, residential life, and community engagement. Students on SFS programs come from a wide range of colleges and universities, as well as from a variety of academic backgrounds and majors, such as, ecology, biology, economics, English, political science, anthropology, and many others. This diversity of backgrounds is a strength of SFS programs and a learning opportunity for all students. At SFS students are intellectually challenged by their faculty, classmates, and the community, while studying in an unfamiliar area. Students have the opportunity to take a leadership role in those subjects in which they have expertise. Students are expected to critically analyze the drivers of local environmental, social, and economic problems. Semester students also participate in field research and communicate their findings with the goal of providing information to local decision-makers who can address those problems.

Because SFS is a residential study abroad experience, credit is given for program completion, not just course completion. Attendance from the start of the program to the last day of the program is necessary for students to earn credit.

STUDENT PARTICIPATION
SFS gives credit for program completion, and completion means more than just “presence on a program.” It means fully engaged learning, participation in academic and non-academic activities and exercises, and completion of academic tasks and assignments – in the field and in the classroom. The constituents (sending schools or home institutions) and the School of Record for SFS expect that the credit a student earns while at SFS is a result of full participation and successful completion of demanding field-based academic work and all components of an SFS program. All students must participate fully in all Center program activities (academic and non-academic). Repeated voluntary lack of participation (missing class, refusal to perform activities or exercises) or repeated involuntary lack of participation (being physically unable to perform activities or exercises due to illness or injury) may result in student removal from program.

SYLLABI
Students will be presented with course syllabi once they arrive to their SFS Center and exact syllabi for future terms are not available in advance. Sample syllabi from previous semesters are available on the SFS website and can be viewed and downloaded from the specific program page. When reviewing the sample syllabi, please note that SFS programs are different from other travel or study abroad programs. Each iteration of a program is unique and often cannot be implemented exactly as planned for a variety of reasons. There are factors which, although monitored closely, are beyond our control. For example:

- Changes in access to or expiration of permits to the highly regulated and sensitive environments in which we work;
- Changes in social/political conditions or tenuous weather situations/natural disasters may require changes to sites or plans, often with little notice;
- Some aspects of programs depend on the current faculty team as well as the goodwill and generosity of individuals, communities, and institutions which lend support.

Please be advised that these or other variables may require changes before or during the program. Part of the SFS experience is adapting to changing conditions and overcoming the obstacles that may be present. Students are encouraged to review these sample syllabi and can also find examples of previous research projects on the SFS website.
GRADING

SFS courses are rigorous, challenging, and the field based approach mandates that students demonstrate their knowledge of theory and practice by applying such theory and practice to actual problems. Because SFS exams are based on the application of knowledge and the synthesis of concepts and observations, the courses are generally thought of as difficult.

Grades are determined via various assessments, such as exams, quizzes, practical examinations, field exercises, presentations, homework, and final papers. The specific grading guideline for each course will be presented in the course syllabus, which students will receive upon arrival to the SFS Center. Grading will not be exactly the same as students are accustomed to on their home institutions—many students are surprised that different faculty have different grading strategies and that there can be cultural differences, as well. Students are encouraged to engage with their SFS faculty at the beginning of the semester with any doubts or uncertainties about the grading system.

SEMESTER PROGRAMS

Core Disciplinary Courses

In semester programs, three core disciplinary courses provide the background information and skills needed to understand and address complex environmental issues. Each course is designed to provide students with transferable academic credit according to the U.S. University and College system. Courses are participatory in nature and are designed to stimulate inquiry and active learning. Faculty members provide students with an interdisciplinary and holistic framework for their process of inquiry into environmental and socioeconomic issues. Problem-based inquiry guides students through an analysis of actual local environmental situations or dilemmas. Throughout the integrated curriculum, students strive to understand the background, context, and relevance of local issues well enough to enable them to explore potential solutions and alternatives through research and critical thinking. Each course combines lectures, field exercises, assignments, tests, and research.

Directed Research

The Directed Research (DR) course is the capstone of the semester program. Students conduct research projects that addresses the key research themes defined in the Strategic Research Plan (SRP) and support the community with environmental planning and action. Students do not choose their own research theme but will work on one of several ongoing projects identified by the Center staff and developed and led by SFS faculty. Students will have the opportunity to indicate their preference between several areas of research. Each student will join a faculty-led team that will develop a specific question and carry out field research, data analysis and communication of results. Projects are carried out in one or more disciplines including: ecology, natural resource management, conservation science, environmental ethics, and socioeconomics. DR data is often collected and analyzed as a team. Students, either individually or in small collaborative groups, will develop findings and incorporate those into their papers (see Directed Research sample syllabus for more details). Final papers may be written individually or in small groups, depending on the structure and dynamic of each project. Some semester DR projects may only have a collaborative (co-author) option. The core skills students will learn through the DR experience are field skills, analytical skills, communication skills, and critical thinking, as well as teamwork and time management. Students present their findings from their DR to classmates, key stakeholders, and other community members.

SUMMER PROGRAMS

In each summer program, one interdisciplinary course provides the background information and skills needed to understand and address complex environmental issues. These courses are designed to provide students with transferable academic credit according to the U.S. University and College system. Courses are participatory in nature and are designed to stimulate inquiry...
and active learning. Faculty members provide students with an interdisciplinary and holistic framework for their process of inquiry into environmental and socioeconomic issues. Problem-based inquiry guides students through an analysis of actual local environmental situations or dilemmas. Throughout the integrated curriculum, students strive to understand the background, context, and relevance of local issues well enough to enable them to explore potential solutions and alternatives through critical thinking. Courses combine lectures, field exercises, assignments, and tests.

Students may take one or both summer courses. Students that take both courses (sequential or “summer combined” students) will receive eight total credits for the combined summer sessions. Please visit our website (https://fieldstudies.org/) for a detailed description of each of the above courses.
AFTER YOUR SFS PROGRAM
AFTER YOUR SFS PROGRAM

PLAN AHEAD: OBTAINING AN OFFICIAL TRANSCRIPT

As part of the enrollment process after acceptance to a program, all students must submit the Transcript Request Form (TRF) to indicate the address where they plan to receive their SFS transcript at the end of the program. If this information changes after submission of the TRF, changes should be sent to admissions@fieldstudies.org.

SFS Transcripts
Students from an affiliate institution that provides direct credit will receive a transcript directly from the SFS Registrar.

For semester programs, an official grade report will automatically be mailed to the student’s home school within 4-6 weeks of the completion of the semester program.

For summer programs, transcripts will be mailed 4-6 weeks after completion of the summer session 2.

All students will be mailed an unofficial student copy of their transcript. Unofficial copies are mailed to each student’s permanent address as listed on their SFS online application form.

Additional transcript requests should always be made directly through SFS as students from affiliate institutions will not have been registered for credit through the SFS School of Record, the University of Minnesota.

Please wait until the initial transcript has been received before requesting additional copies.

To check if your home school is an affiliate institution, visit the SFS website:
https://fieldstudies.org/alumni/resources

School of Record Transcripts
Students from non-affiliate institutions or an affiliate institution that does not provide direct credit will be registered for credits at the SFS School of Record and will receive transcripts directly from the University of Minnesota Registrar.

All student grades will be reviewed by the SFS Dean after the end of the session and sent to the University of Minnesota to be processed. Students can expect to receive their transcripts from the University of Minnesota about 4-6 weeks after the end of the program. For summer programs, transcripts will be sent 4-6 weeks after the end of summer session 2.

Transcripts will be sent to the address provided on the Transcript Request Form (TRF). Note: students who provided a personal address rather than the address of a college or university on the TRF, should not open the sealed transcript envelope, as it will no longer be considered an official transcript once the seal has been broken and it has been opened.

Additional transcript requests should always be made directly through the University of Minnesota:
http://onestop.umn.edu/grades_and_transcripts/official_transcripts/

Please wait until the initial transcript has been received before requesting additional copies.
ACCESSING SFS MATERIALS AFTER THE PROGRAM

SFS does not keep copies of written papers, homework assignments, research reports, and other handouts from the faculty. These materials and cannot be reconstructed after students return from the field. As such, SFS strongly recommends that students keep copies of any materials such as written papers or handouts that they may wish to access after the program has concluded.

REQUESTING REFERENCES FROM SFS FACULTY

Some students request references from their SFS professors for graduate study or fellowship applications. Faculty are not obligated to write a student a letter of recommendation, and the decision to write the letter will be based on the professor’s workload and student’s SFS performance. Students are responsible for maintaining the contact information of their faculty and Center Directors. Since SFS instructors are frequently in the field engaged in teaching or research, it may be difficult to contact them—expect a delayed turnaround time and plan accordingly.

REPRESENTING SFS ON YOUR RESUME

Upon completing an SFS program, you will have a number of skills and experiences that should serve you in your future studies and professional endeavors. SFS will have given you specific skills in intercultural competence, foreign language, field research, and data analysis that will make your résumé stand out. Thus, SFS encourages you to take full advantage of the SFS experience by representing your participation in the program on your résumé or curriculum vitae. See below for preliminary ideas:

**Education**

Study abroad: The School for Field Studies (SFS), [Name of course], [Name of SFS Center], [Location] (# credits, University of Minnesota: Twin Cities), [Program date].

E.g. The School for Field Studies (SFS), Tropical Rainforest Studies, Centre for Rainforest Studies, Queensland, Australia (16 credits, University of Minnesota: Twin Cities), Fall 2008.

**Field Experience**

[Year of experience] “[Title of your DR project],” [brief description of the skills you developed; e.g., field survey of birds in forests and roadsides, scientific presentation]. [Location], [Time span; e.g., July-Aug].

E.g. 2008 “Growth rate of *Calycophyllum spruceanum* in fields and forests,” experimental design, field data collection, scientific writing and oral communication. Peru, Sep-Dec.
ACADEMIC POLICIES AND PROCEDURES
ACADEMIC POLICIES AND PROCEDURES

As a condition for participation in an SFS program, students are required to document that they have read, understood, and accepted all academic, behavioral, safety, administrative, and operational policies, rules, and requirements in this document and in SFS Policies and Procedures by reading and signing the SFS Enrollment Contract.

GRADING, INCOMPLETES, AND WITHDRAWAL ON COURSES

Credit Policy
SFS does not grant partial or incomplete credit. Due to the interdisciplinary nature of our programs, students must be present from the first day of orientation to the last day of wrap-up and presentations in order to receive credit for all courses. SFS gives credit for program completion, not just course completion. Attendance from the start of the program to the last day of the program is necessary for students to earn credit.

Grading Policy
Courses may not be taken on a pass/fail or audit basis. SFS will report letter grades, as determined by the SFS letter grade scale (below), to UMN and to SFS affiliate schools for every student. SFS does not "round-up" numerical grades (e.g., a final grade of 89.99% receives a letter grade of B+ and is not rounded up to 90.00, or A-).

Letter Grade Scale

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>95.00-100.00%</td>
</tr>
<tr>
<td>B</td>
<td>86.00 – 89.99%</td>
</tr>
<tr>
<td>C</td>
<td>76.00 – 79.99%</td>
</tr>
<tr>
<td>D</td>
<td>60.00 – 69.99%</td>
</tr>
<tr>
<td>A-</td>
<td>90.00 – 94.99%</td>
</tr>
<tr>
<td>B-</td>
<td>83.00 – 85.99%</td>
</tr>
<tr>
<td>C-</td>
<td>73.00 – 75.99%</td>
</tr>
<tr>
<td>F</td>
<td>0.00 – 59.99%</td>
</tr>
</tbody>
</table>

Incompletes
In general, an incomplete is a temporary status for students who have temporarily left an academic program with the intent of completing outstanding coursework by a predetermined date. SFS programs are internationally based, field-orientated, and require fulltime on-site participation in all program activities; therefore, SFS does not grant incompletes.

Policy for Early Departures
In the case of a student making a permanent departure from an SFS program without completing outstanding coursework, the Credit Policy will apply. Moreover, any student who departs the program prior to completion will receive a "W" ("Withdrawn") for the course. If the student must leave due to medical reasons and receives a medical withdrawal, some credit may be awarded at the discretion of the Office of Academic Affairs. More information about medical withdrawals or dismissals from an SFS program can be found in SFS Policies and Procedures.

REQUESTING REVIEW OF FINAL GRADES

It is the responsibility of the faculty to articulate how grades are determined. It is the responsibility of students to consider these explanations and, if there is a lack of clarity, to request clarification immediately, rather than after transcripts are received.

Students who feel that there are grade inconsistencies should explain their concerns first to the relevant faculty in writing while at the field site. Their explanation must be in writing and include both their reasons for requesting a grade review and their specific request. Faculty members have the obligation to respond fully, clearly, and promptly to any student grade inquiries.

If a satisfactory solution cannot be arranged between a student and their faculty while at the field site, students may make a written request for an explanation of the faculty member’s decision for presentation to the Center Director or lead faculty for further consideration. The Center Director or lead faculty will review the case with the faculty member.

If a resolution cannot be made with the Center Director or lead faculty at the field site, the petition for a grade change will be forwarded to the Dean of the School for review. The Dean’s review will generally be limited to determining whether fair standards were set and followed.
After a student departs a program (i.e., when the student physically leaves the Center), the only grade changes SFS will consider are those which involve mathematical or transcription errors.

**ACADEMIC AND RESEARCH HONESTY POLICY**

SFS has a zero-tolerance policy towards student cheating, plagiarism, data falsification, and any other form of dishonest academic and/or research practice or behavior (including but not limited to, standards set by any college or institution with which the student is associated). As a result, any SFS student found by SFS to have engaged in or to have facilitated academic and/or research dishonesty will receive no credit (0%) for that activity. The faculty make their best efforts to clearly state whenever collaboration between students in the preparation of work is deemed acceptable and the extent of collaboration that is permissible.

In addition to the zero percent (0%) mark for the particular activity, SFS reserves the right, using its sole and unfettered judgment about the severity or recurrence of the transgression, to expel a student from any program in which the student is participating. A student who is expelled from a program may receive a grade of “Withdrawn” (W) or “Failure” (F) for each of the courses of the program. The expelled student will not be entitled to any financial refund from the program.

SFS considers it appropriate to report to a student’s principal academic organization any behavior that reflects on the character, integrity and/or academic ability of a student. Therefore, when a finding of academic dishonesty has been made, SFS will report the decision, as well as the sanction imposed, to any college or institution with which the student is associated, as well as to UMN, the school of record. Through participation in an SFS program, each student shall be deemed to have expressly waived any right to prevent such disclosure that might otherwise exist in law or by contract.

Nothing in this policy shall prevent any college or institution with which the student is associated from reviewing the violation and taking actions pursuant to its own policies on academic misconduct, including its policies on sanctions or the recording of an offense on a student’s record.

More information about program dismissal and disciplinary action can be found in SFS Policies and Procedures.

**INTELLECTUAL PROPERTY, DATA, AND ACKNOWLEDGEMENT POLICIES**

In recognition of this institution’s obligation to transfer technology and useful discoveries to local communities, fellow researchers, and society, SFS encourages the creation of scholarly works by SFS faculty, staff, and students as an integral part of its mission. This section should clarify the rules for ownership and use of data generated during the SFS program, and it presents guidelines for the production of scholarly works.

**Data and Educational Materials Ownership**

SFS is the owner of all academic products developed and research data collected by students while participating in an SFS program or through the use of facilities or funds provided by or through SFS. No student may utilize these data for any purpose other than scholarly works. “Scholarly works” include, but are not limited to, the production of i) required coursework outputs, ii) reports to approved SFS clients such as Directed Research papers and related products, iii) conference presentations, and sometimes iv) publications, and v) senior theses. The use of these data by students for undisclosed and unapproved personal benefit or commercial application, financially or professionally or in any other way, is not permitted.

**Use of Directed Research Data for Scholarly Works and Thesis**

Because the research projects conducted at the Center are linked to the Strategic Research Plan, and projects are defined and prioritized by Center faculty, the SFS faculty advisor is considered the principal investigator of the project. As a member of the research team, students who have collected data during their program period will have access to these specific data from their SFS program. Students may pursue the production of scholarly works, such as a senior thesis, using SFS research only under consultation with and approval by the project’s principal investigator (i.e. the faculty supervising the DR project). If the principal investigator is no longer with SFS, approval may be granted by the Center Director or the Dean of the School. In some instances, collected data may not be suitable for purposes such as a thesis.

The purpose of the Directed Research (DR) project is to contribute to a broad and ongoing research agenda that has been defined by SFS staff. Therefore, SFS cannot cater the DR projects to independent student interests or academic requirements at a student’s home institution. Similarly, since the DR paper and other research assignments are works produced for an SFS course, students must hand in original work, therefore we generally cannot accommodate using data from research conducted at the home institution.
For students hoping to develop some aspect of their SFS Directed Research into a thesis at their home institution, the responsibility for seeking clarity on research requirements from SFS and their home institution lies solely with the student. Students should discuss this option with their SFS Admissions Counselor prior to starting the program, though approval will not be able to be granted in advance of the program. Once on the program, students should communicate their interest with the Center Director and their DR advisor and seek approval while on the program.

It is also critical that the student discusses this option with their faculty advisor at their home institution before, during, and after their participation in the program. Students and home advisors should bear in mind that students will not have the opportunity to pursue independent research or research on a topic unrelated to the DR. Also, data collection is usually completed as part of a team effort. Past students have discovered when returning to their home institutions that their efforts when broken down as part of a team where not sufficient to fulfill a research requirement beyond that for which they were credited through SFS.

The SFS faculty advisor is solely responsible for assessing the content and quality of student work for the DR. Likewise, the student’s thesis advisor at their home institution will be responsible for assessing subsequent work. It may be appropriate for students to invite their SFS advisor to serve on their thesis committee.

SFS requires students to take the following steps in the development of scholarly works, including a senior thesis, conference presentation, or manuscript for publication:

1. Discuss proposed plans with SFS faculty or Center Director, preferably while still at SFS;
2. Formally request permission from the SFS faculty to use the data for scholarly work outside of SFS;
3. Develop an authorship plan and work plan with SFS faculty, and, in the case of a senior thesis, with their home institution advisor;
4. All authors prepare the scholarly work;
5. Acknowledgements (see below) and institutional affiliation details are determined in discussion with SFS and the student’s home institution.

SFS Acknowledgment Policy
In all scholarly works submitted for publication and based upon SFS data, the authors, whether currently or previously students at SFS, are required to acknowledge SFS, the Center, and all SFS employees and students who were involved in the project. In addition, publications or presentations by SFS employees that are based on data obtained by students during the conduct of SFS program coursework will, at a minimum, give acknowledgement to SFS classes who contributed to the research and full acknowledgement to the students who made a significant contribution to the research. The inclusion of students as co-authors by faculty is optional and will be based on merit, contribution, and relevance.

The appropriate acknowledgement of SFS is as follows:
“The Author gratefully acknowledge(s) the key [financial and/or field and/or logistical and/or other] support provided by The School for Field Studies (SFS) Center for [name and location of Center, e.g.: Center for Rainforest Studies, Australia]”

NOTE: In the case of both author address and acknowledgement, “The School for Field Studies (SFS)” is always identified and always placed before the name of the Center.

Research Ethics
The research our faculty and students conduct complies with the research ethics rules and guidelines in the country in which they are working, and when applicable, permissions are obtained for research on human subjects, animal subjects, and for the extraction of biological samples. Additional vetting for human subjects research is made by the SFS Office of Academic Affairs to ensure standards of ethical practice and protection of subjects are met.

Photography
Students are encouraged to bring cameras to the field. Still photography and video photography are allowed during many academic program activities, but may be restricted based on location, social cultural context, and/or the disposition of a speaker or lecturer. Students should understand that US laws do not apply while abroad. Photography in some public spaces may not be allowed by non-citizens and equipment may have to be surrendered to authorities upon request. Students should always check with local staff on standards of use of photography while in the field. Students should not bring to the field
camera equipment that is intended to be operated remotely from the user. This means DO NOT bring: camera traps, drones, balloons, or other photographic equipment that is not intended to be held by the operator. Remote operated cameras may be seen by international authorities as surveillance equipment – and in many contexts be illegal. SFS faculty often have permissions/permits to use remote photography for research. These uses are permissible and will be performed with SFS approved equipment.
