Political and Socioeconomic Dimensions of Environment

SFS 3040

Syllabus
4 credits

The School for Field Studies (SFS)
Center for Climate and Sustainable Futures (CCSF)
Paro, Bhutan

This syllabus may develop or change over time based on local conditions, learning opportunities, and faculty expertise. Course content may vary from semester to semester.

www.fieldstudies.org
© 2023 The School for Field Studies
Please note that this is a copy of a recent syllabus. A final syllabus will be provided to students on the first day of academic programming.

SFS programs are different from other travel or study abroad programs. Each iteration of a program is unique and often cannot be implemented exactly as planned for a variety of reasons. There are factors which, although monitored closely, are beyond our control. For example:

- Changes in access to or expiration or change in terms of permits to the highly regulated and sensitive environments in which we work;
- Changes in social/political conditions or tenuous weather situations/natural disasters may require changes to sites or plans, often with little notice;
- Some aspects of programs depend on the current faculty team as well as the goodwill and generosity of individuals, communities, and institutions which lend support.

Please be advised that these or other variables may require changes before or during the program. Part of the SFS experience is adapting to changing conditions and overcoming the obstacles that they may present. In other words, this is a field program, and the field can change.
Course Overview

Bhutan is internationally known for its development concept of Gross National Happiness (GNH). GNH is the guiding principle of development in Bhutan and is understood to have four pillars: sustainable and equitable socioeconomic development, environmental conservation, cultural promotion and preservation, and good governance. The Buddhist principle of The Middle Path, integrating people and nature as well as traditional knowledge and modern science, is at the core of the country’s development approach and practices. Sustainable management of natural resources, including land, water, and biodiversity, is critical for Bhutan, as these resources are fundamental to the national identity as well as the economy.

In 2008, Bhutan’s government shifted from an absolute monarchy to a constitutional democratic monarchy, part of a longer trend of devolution of authority from an absolute monarch to the people and communities. Since most of the population reside in rural areas, sustainable management of natural resources is critical for achieving the dual goals of rural development and biodiversity conservation. In this course, we examine the socio-cultural, political, and economic dimensions of Bhutan’s approach to development, with a focus on environment. We will use the interdisciplinary lens of political ecology to frame lines of inquiry and define research questions on the nature-society nexus.

In this course, we focus on human interactions with and impacts on local ecosystems, and vice versa. By using Bhutan as an example, the course provides a conceptual framework for understanding how nature-society interactions, such as agriculture, water management, biodiversity conservation and utilization, and rural development shape both the natural landscape and the social and economic conditions in rural and urban areas. Because these interactions can be simultaneously social, cultural, economic, and ecological, holistic critical thinking is essential to understand these systems to enable us to propose solutions that make sense. The course provides the conceptual and practical skills and tools to critically examine and assess the human-environment nexus in the field. We also consider the theories and ethics of sustainable and unsustainable development and the need to view these issues in ways that are inclusive and just.

Learning Objectives

The objective of this course is to provide students with a learning experience in which they can gain deep understanding of a set of locally relevant topics and their wider resonance through the application of field observations and development of analytical skills. Classroom and field lectures will provide core concepts and tools for inquiry, while field exercises will reinforce concepts and present students with opportunities to apply their knowledge and tools to real problems.

In this course, students should be able to:

1) Describe key actors and events in Bhutan’s history and environmental policy development;
2) Understand and apply multi-disciplinary concepts related to rural development, conservation, and national development to Bhutan;
3) Identify challenges and opportunities in The Middle Path approach to development;
4) Connect culture to society and both to the natural landscape. Understand and critically evaluate the role of economics, politics and culture in environmental issues including climate change impacts;
5) Clearly communicate what they have learned through analyses and explication;
6) Employ an array of social science research methods for field research and data handling
Assessment

Our goal is to conduct ongoing assessment of student learning throughout the course and provide timely and constructive feedback. Some assignments encourage students to work together, to share ideas and knowledge. This allows students to take advantage of the range of backgrounds within the group. Assessment will be conducted on an individual basis, unless otherwise stated. The final course grade will be based on the following:

<table>

</tbody>
</table>

Participation (10%)

During this program we will travel through many eco-regions and rural communities. We expect that you will be an active observer, constantly observing the landscape, livelihoods, and culture and participating in discussions regarding these observations. Active participation includes constructive engagement with the full range of course activities, respectful awareness of Bhutanese cultural context, and responsible behavior as a group member who is involved in others’ learning. There will be opportunities throughout the semester for constructive feedback.

Student Led Discussion (15%)

This course has a strong emphasis on critical thinking and discussion of different theories and concepts. Many modules will end in a discussion section, led by a small group of students. You will be asked to provide two short readings for the class based on that thematic topic, make a short presentation on a related topic, moderate the discussion section and deliver a short peer-reviewed essay. The objective is for students to sharpen their presentation abilities, powers of observation, critical thinking, and to connect concepts to realities. Students will be assessed for their ability to clearly articulate concepts and their thoughts in writing, to notice discrepancies between claims and realities, and to stimulate critical discussion. Discussion section topics: (1) Development and Alternatives, (2) Gross National Happiness and The Middle Path, (3) Tourism and Sustainability, (4) Debates in Climate Change, (5) Anthropocene

Graded Field Exercises (FEX) (45%, 15% each)

**Embodying Cultural Landscapes (15%)**

Here, we are introduced to the significance of cultural landscapes and experiential ways of moving through them. Students will walk to and visit pilgrimage sites in Thimphu valley, including Tango Monastery and Pangri Zampa College of Astrology. You will learn about the intimate relationships between symbolism and physical bodily practices and reflect on experiences of immersion and non-textual ways of reading or mapping a landscape. We also ask what do maps conceal as they reveal?

**Mapping Livelihoods (15%)**

We will geolocate ourselves, explore the local area, note development indicators, and examine changes in the landscape and livelihood strategies based on proximity to town. In small groups, students will survey routes and create a rough map of land use and livelihood strategies and
note the ways that these change in relation to distance from Paro town. Students will learn basic mapping skills and alternative ways to approach mapping as a geographical tool. What are some of the roles played by mapping in conservation and development initiatives?

**Religion and Environment – Research Methods in Social Science (15%)**
We will build our field data collection skills by conducting semi-structured interviews in small groups with monks at the Sangchhoekhor Buddhist College or the Tara Monastery in Paro. Students will seek to understand the relationship between Buddhism and the natural environment. What are some of the philosophies/thinking behind their views? How strong are the beliefs/views and are they changing with time? Students will review the data collected and revise questions for future qualitative research.

**Ungraded Field Exercises (FEX)**
**Life Cycle Assessment (Ungraded)**
We will visit an industrial estate in southern Bhutan to learn about the processes involved in the production of a popular consumer product. This FEX gives you an opportunity to observe and record how and where the raw materials needed for the production are sourced from, what goes into the production and processing of the product, and what happens to the product produced. The aim of the visit is to follow an everyday product from its inception to its end in order to appreciate its carbon footprint.

**Wildlife Documentary – Discourse Analysis (Ungraded)**
The wildlife film industry is big business. What is the role of media in conservation? What are the cultural productions of nature evident in programming, and what are the politics of representation? We engage in a discourse analysis exercise to address these questions.

**Final Exam (30%)**
One final comprehensive final exam will be administered, at the end of the course. You will be examined on what you have been exposed to in class (lectures, discussions, etc.), the field, and readings. The exams will challenge students to draw on multiple concepts and experiences, and to synthesize information.

**Grading Scheme**

**General Reminders**

**Readings** – You are expected to have read all the assigned articles prior to each class, and can expect to be tested on required reading. All readings are available as PDFs. Readings may be updated or changed during the course of the semester.
Plagiarism – Using the ideas and material of others without giving due credit is cheating and will not be tolerated. A grade of zero will be assigned if anyone is caught cheating or aiding another person to cheat actively or passively (e.g., allowing someone to look at your exam). All assignments unless specifically stated must be individual pieces of work and follow academic conventions of citation and referencing.

Deadlines – Deadlines for written and oral assignments are instated for several reasons: They are a part of working life to which students need to become accustomed and promote equity among students. Deadlines allow faculty enough time to review and return assignments before others are due. Late assignments will incur a 10% penalty for each day that they are late. No assignment will be accepted after three days. Assignments will be handed back to students after a one-week grading period.

Participation – Since we offer a program that is likely more intensive than you might be used to at your home institution, missing even one lecture can have a proportionally greater effect on your final grade simply because there is little room to make up for lost time. Participation in all components of the course is mandatory, it is important that you are prompt for all activities, bring the necessary equipment for field exercises and class activities, and simply get involved.

| PS 7 | **Dev. I: Promises and Realities**  
We examine just what is (and was) meant by (international) development, its history, and trajectories. | L | 1:15 | Mancall 2004, pp. 1-50  
Rist 1997, pp. 1-24  
Cowan & Shenton 1995, pp. 27-43  
Peet & Hartwick 2009, pp. 1-19 |
| PS 8 | **Dev. II: Development Indicators: a brief introduction**  
What is the history of development indicators, and how have they come to matter so much? Using key critical concepts, we will attempt to deconstruct development indicators as a social construct with dramatic implications. | L | 1:15 | Gupta 2010, pp. 13-16  
Crewe & Axelby 2013, pp. 88-106 |
| PS 9 | **Doughnut Economics**  
Kate Raworth explains what a sustainable, universally beneficial economy would look like. How do we create regenerative, distributive economies that would work within the planet’s ecological limits. | L | 1:15 | Raworth Ted Talk (2018) |
| PS 9 | **The Himalayan Dilemma and Political Ecology**  
What is the Himalayan Dilemma? What is THED and why do narratives matter? Political ecology and its relevance to understanding environmental problems is introduced. | L | 1:15 | Robbins 2012, pp. 11-24  
Orlove 2016, pp. 227-242 |
| PS 10 | **FEX 2: Mapping Livelihoods**  
We will explore local areas, note development indicators, and examine changes in the landscape and livelihood strategies based on proximity to town. In small groups, students will survey routes and create a rough map of land use and livelihood strategies and note the ways that these change in relation to their proximity to Paro town. | FEX | 4:00 | Paro Dzongkhag Profile, RGOB |
| PS 11 | **Globalization, Production Chains, and Life Cycle Assessments (LCA)**  
What is globalization, how does it influence the environment and economies, where are we positioned in the production chain, and what might our roles be as producers and consumers? How ‘green’ is green? | L; D | 1:15 | Kopnina 2017, pp.24-33  
Goleman 2009 |
| PS 12 | **EIAs and Himalayan Hydropower**  
We’ll learn about the EIA process and discuss why it is important in context of Himalayan hydropower development. What are the political-economic roles of regional actors in the development and function of Bhutan, and Bhutan’s role in regional and global development? | L | 1:15 | McCullough 2017  
Hayden 2015 |

<th>Readings</th>
</tr>
</thead>
</table>
| PS 13 | **Chhukha Hydropower Plant Visit**  
We will travel to Chhukha Hydropower Plant (CHP) and learn about its history and inner workings. Hydropower is still one of the largest economic drivers of the country. Often termed ‘blue gold,’ the rivers of Bhutan have been harnessed to produce electricity, both for domestic consumption and for export. This is a rare opportunity that allows students to observe and learn firsthand how the production of this renewable energy is carried out in Bhutan. | FL   | 4:00       |                                                           |
| PS 14 | **FEX 3: Life Cycle Assessment (LCA)**  
We will visit an industrial estate in southern Bhutan to understand the processes involved in the production of a consumer product. Observe and record how and where the raw materials are sourced from, what goes into the production and processing of the product (input), and what happens to the product once produced. The aim of the visit is to follow an everyday product from its inception to its end to appreciate its carbon footprint. How ‘green’ is green? And what does it mean to be part of a global economy? | FEX  | 3:00       | Goleman 2009              |
| PS 15 | **Role of institutions in Environmental Governance**  
What comprises global environmental governance, and what are some of the roles played by the international community, NGOs, development partnerships and civil society? | L    | 1:15       |                                                           |
| PS 16 | **Role of institutions in Environmental Governance**  
What is meant by the Middle Path of Development and how does this relate to GNH? How developed does Bhutan consider herself within the GNH framework? How does Bhutan’s development compare to the rest of the world? | L    | 1:15       | Ura, et al 2012  
Boniwell 2017, pp. 1-20  
Short Film: Tshering Tobgay TED Talk |
| PS 17 | **Environmental Governance in Bhutan**  
We learn about Bhutanese environmental policies and their evolutions. Here, issues involved with natural resources / protected areas governance will also be addressed. How to balance conservation and development? What policies promote/hinder this balance? | GL   | 1:15       | NEC 2016, pp. 1-29, 49-57 |
| PS 18 | **Critiques of Development and Alternatives**  
What are some of the problems with ‘development?’ You are to look at alternative definitions and readings on development. You will be asked to provide two short readings for the class on the theme ‘Alternative Development.’ Make a short presentation on a related topic, moderate the discussion section, and deliver a short peer-reviewed essay. The objective is to sharpen your presentation abilities, powers of observation, critical thinking, and to connect concepts to realities. | D    | 1:15       | Peet & Hartwick 2009, pp. 197-239 |
<table>

| PS 19 | Tourism – Eco-tourism  
What are the challenges and opportunities offered by the tourism sector to various stakeholders? What is ecotourism in the Bhutanese context? What is the role of culture and the natural environment in tourism? | L    | 1:15       | RGOB 2012  
    RSPN 2017 |
| PS 20 | GNH – A lived experience  
You will be asked to provide two short readings for the class on the theme – GNH and development - give a short presentation, moderate a discussion, and deliver a short peer-reviewed essay. The objective is to sharpen your presentation abilities, powers of observation, critical thinking, and to connect concepts to realities. | D    | 1:15       | Phuntsho 2013, pp. 595-599         |
| PS 21 | Caterpillar Fungus and Sustainable Development  
What is "summer grass, winter worm" and what has its role in Bhutan's regional economic development been? What are unanticipated environmental, political, and economic consequences of its marketization, and how are they being addressed? How do national-level policies play out on the ground? | L    | 1:15       | Wangchuk & Wangdi 2015             |
| PS 22 | Gendered Natures  
We will deconstruct ideas surrounding gender and environment through a feminist political ecology perspective. We will look at women's roles in environmental conservation and management. | L    | 1:15       | Torres & McElwee 2017, pp. 133-145  
Rocheleau, Thomas-Slayter & Wangari 2006, pp. 14-40 |
| PS 23 | Sustainable Development Trade-Offs: Mechanization and Technologies in Agriculture  
What does the mechanization of labor mean for sustainable development, and what are the resultant gains and losses to environment and human wellbeing? We embark on a field lecture in Paro to see technological transitions in progress. | FL; GL | 4:00     | White, Jr. 1967                   |
| PS 24 | Sustainable Tourism: Realistic or A double-edged sword?  
You will be asked to provide two short readings for the class on the theme - sustainable tourism - give a short presentation, moderate a discussion, and deliver a short peer-reviewed essay. The objective is to sharpen your presentation abilities, powers of observation, critical thinking, and to connect concepts to realities. | D    | 1:15       | Kuyakanon 2014, pp. 183-205  
Allison 2015, pp. 197-226        |
| PS 25 | FEX 4: Buddhism & Conservation  
The objective of this FEX is to understand how Buddhists regard their place in the world vis-à-vis nature. What are some philosophical arguments supporting their beliefs. Students will interact with the monks of Sangchhoekhor Buddhist College and will be introduced to the semi-structured interview method of social science research. | FEX   | 4:00       |                                |
